Why Choose Raddx Healthcare?

We uphold the highest standards in radiology to guarantee reliable and precise diagnoses for healthcare providers and their patients.

Quality Assurance

Key Aspects of Our Quality Assurance Program

- ✓ Board-Certified Expert Radiologists
- ✓ AI-Integrated Advanced Imaging
- ✓ Standardized & Reliable Protocols
- ✓ Continuous Audits & Evaluations
- ✓ Global Compliance & Ethics
- ✓ Patient-Centric Care & Reporting
- ✓ Feedback-Driven Improvement

Our Services

Radiology

At Raddx Healthcare, we specialize in rapid and accurate emergency radiology, ensuring precise diagnoses for critically ill and trauma patients. Our board-certified radiologists provide trusted, seamless remote image interpretation, customized to integrate effortlessly with your facility's workflow.

Neuroradiology

Advanced neuroimaging is vital for diagnosing and treating neurological disorders like stroke, brain trauma, neuro-oncology, and degenerative diseases. At Raddx Healthcare, we utilize cutting-edge technologies such as fMRI, ASL, myelography, and neurography to deliver precise insights, enhancing diagnostic accuracy and clinical decision-making.

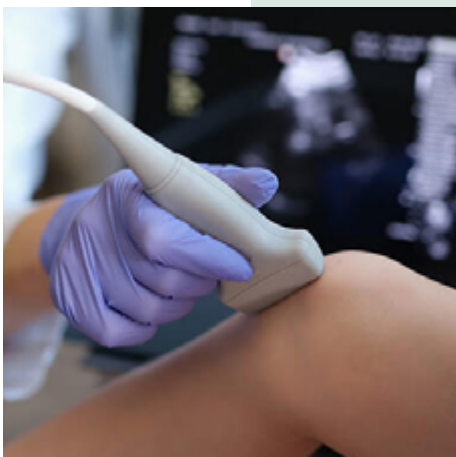

- ✓ Stroke & Cerebrovascular Diseases
- ✓ Brain Trauma & Injury
- ✓ Aging & Degenerative Disorders
- ✓ Seizure & Epilepsy Evaluations
- ✓ Brain Tumors & Neuro-Oncology

Breast Imaging

Early detection is key in the fight against breast cancer and other breast conditions, with one in eight women at risk. At Raddx Healthcare, our specialized women's imaging radiologists deliver precise interpretations for breast cancer, benign breast disease, osteopenia, and osteoporosis, ensuring proactive and effective care.

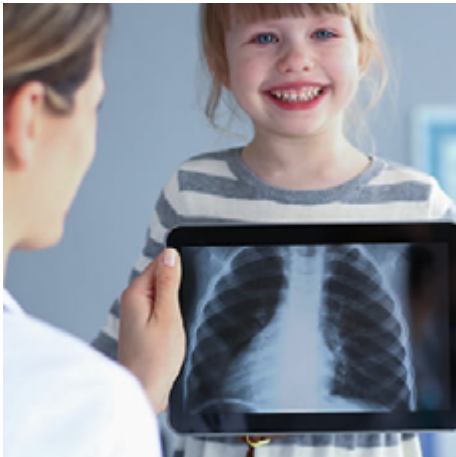

- ✓ Digital Screening Mammography (2D & 3D Tomosynthesis)
- ✓ Diagnostic Mammography
- ✓ Breast Ultrasound
- ✓ Breast MRI
- ✓ Contrast-Enhanced Mammography

Musculoskeletal Imaging

Musculoskeletal imaging is essential for diagnosing conditions affecting muscles, bones, joints, and soft tissues. At Raddx Healthcare, we utilize advanced MRI, CT, ultrasound, and fluoroscopy to deliver precise interpretations, enabling early detection and effective treatment planning for optimal patient care.

- ✓ MRI & CT for Bone and Joint Disorders
- ✓ Musculoskeletal Ultrasound for Soft Tissue Evaluation
- ✓ Fluoroscopy for Dynamic Joint Assessments
- ✓ Advanced AI-Assisted Image Analysis

Pediatric Imaging

Pediatric imaging demands specialized care for fetuses, infants, children, adolescents, and young adults. At Raddx Healthcare, our expert pediatric radiologists use child-friendly, low-dose techniques for safe, accurate diagnoses. From appendicitis to childhood cancers, our advanced imaging helps avoid unnecessary surgery, ensuring precise and timely medical insights.

- ✓ X-Rays
- ✓ Ultrasound
- ✓ CT Scans
- ✓ MRI Scans
- ✓ Nuclear Medicine

Artificial Intelligence

At Raddx Healthcare, we leverage cutting-edge Artificial Intelligence (AI) to revolutionize radiology—enhancing accuracy, efficiency, and patient care. Our AI-driven solutions empower radiologists with precise insights, ensuring faster and more reliable diagnoses for improved medical outcomes.

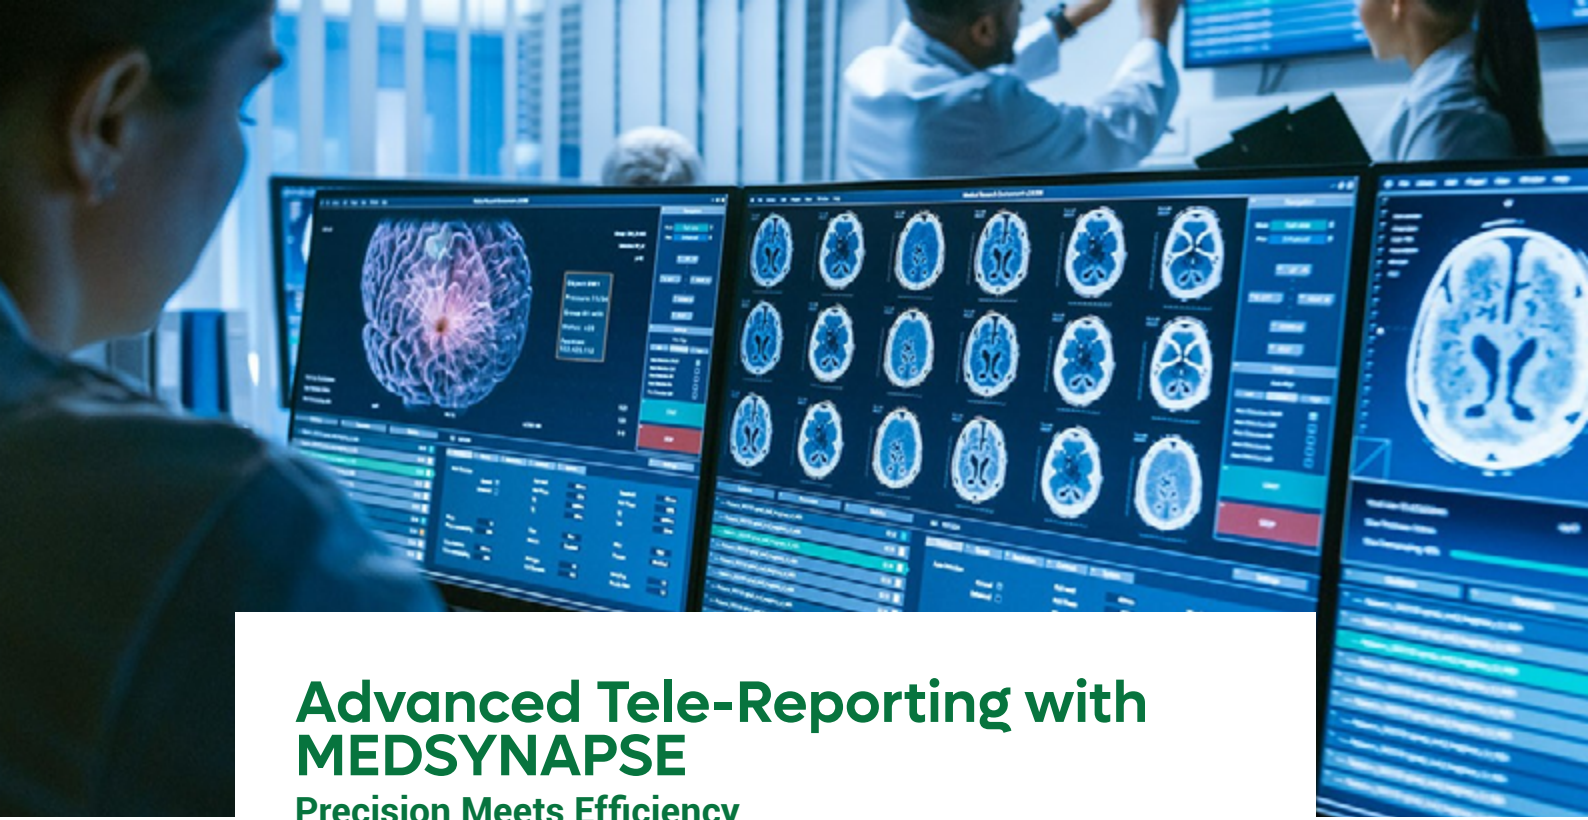

Second Opinion

Accurate diagnoses are vital for effective treatment decisions. At Raddx Healthcare, our Second Opinion Services provide expert reassessments of medical imaging for patients, providers, and insurers. With board-certified radiologists and advanced technology, we ensure precise, reliable second opinions for confident patient care.

Day/Night Service

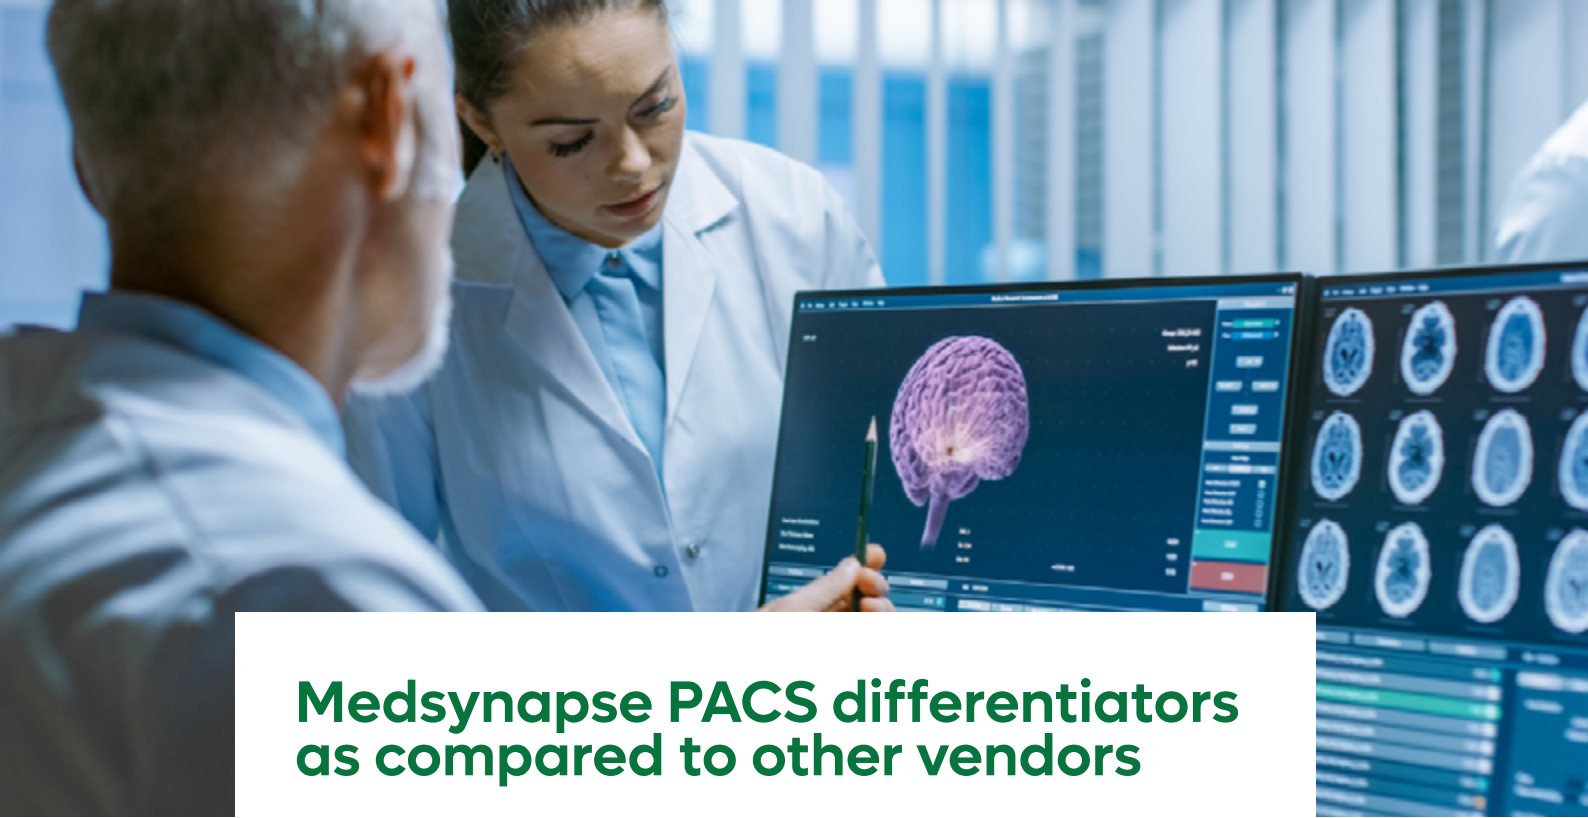

At Raddx Healthcare, we offer 24/7 radiology services, ensuring accurate and timely imaging interpretations—day or night. Whether it's a routine scan or an emergency case, our expert radiologists are always available to provide high-quality reports with quick turnaround times, supporting seamless patient care.

Advanced Tele-Reporting with MEDSYNAPSE

Precision Meets Efficiency

- ✓ Only ISO 9001:2015 & ISO 13485:2016 certified Indian PACS company
- ✓ Only Indian PACS Company with both US FDA and CE approvals
- ✓ Medsynaptic is the pioneer of developing innovative indigenous PACS and Medical Imaging solutions
- ✓ Stable Company with a 21 year history and growth
- ✓ Awarded by NASSCOM, Red Herring, ET Now, CNBC TV, Govt. of Maharashtra etc.
- ✓ Highest number of Multisite Enterprise PACS installations
- ✓ Won several IPRs and Patents for its products
- ✓ Follow all international standards like DICOM, HL7, HIPAA, IHE etc.
- ✓ All technology developed in-house and does not use any freeware DICOM tools
- ✓ PACS is integrated with several HIS companies (both HL7 and Non HL7)
- ✓ OEM provider to several MNCs like Carestream, Agfa, Fujifilm, Siemens, Philips etc.
- ✓ Strong Local service across India with more than 50 personnel
- ✓ Technology Tie-ups with Intel, HP and Microsoft
- ✓ End to End imaging solution provider
- ✓ Customization support available being an in-house developed and Indian PACS

Medsynapse PACS differentiators as compared to other vendors

- ✓ True web based PACS - all features available from any station using internet browser
- ✓ Provides fastest image download speed using in-house developed technology
- ✓ Full Fidelity Image download providing best quality images
- ✓ Vendor Neutral Archive and Vendor Neutral Connectivity
- ✓ Low bandwidth support for Teleradiology, Tele Cardiology
- ✓ Multisite Architecture with centralized image storage including peripheral centre connectivity
- ✓ Support for PACS viewing on latest devices like mobiles, tabs (Android, iOS)
- ✓ Several unique technologies and features
- ✓ Modality specific compression
- ✓ Multithreading support for faster image transfer and download
- ✓ IT Dashboard and MIS Reports
- ✓ Teaching library and Report Text search engine
- ✓ Integration with Non DICOM modalities like Endoscopy, C Arm, Pathology microscopes
- ✓ Best Licensing model
